Rio de Janeiro, May, 29 2024

Dear Sponsors,

The central theme of INAC 2024 was "Nuclear Energy: Ensuring Energy, Health, and Food," fostering a robust debate on the essential role of nuclear technology and its applications in addressing these critical societal issues. The International Nuclear Atlantic Conference (INAC) is the largest biennial conference in the Southern Hemisphere, and the 2024 edition upheld this tradition of excellence. The conference featured three key scientific meetings: the Meeting on Nuclear Reactor Physics and Thermal Hydraulics (XXIII Enfir), the Meeting on Nuclear Applications (XVI Enan), the Meeting on Nuclear Industry (VIII Enin) and Junior Poster Technical Sessions (X Jr Poster). Concurrently, Expolnac, an exhibition showcasing the Brazilian and international nuclear industry, was held in person, highlighting the importance of personal interactions.

The XI edition of INAC attracted 804 registered participants, with approximately 700 attendees visiting Expolnac throughout the week. A total of 494 scientific papers were presented, including 67 oral presentations and 427 poster sessions. The conference featured representatives from seven Brazilian states and eleven countries.

Expolnac showcased booths from both international and Brazilian companies. Highlights included a substantial delegation from China, with representatives from CNNC and other industries, and Russian delegates from Rosatom. The Spanish company Helgeson, and the Brazilian-Argentine ABACC also participated. Notable Brazilian organizations included CNEN, Eletronuclear, FINEP, Amazul, EBSE, Sciofix, Eckert & Ziegler, GLP. Thanks, also, for the participation in the debates and sponsorship of companies like Westinghouse, Holtec, Diamante, ENBPar and MPE Engenharia.

In summary, INAC 2024 was a remarkable success. We successfully met the challenge of organizing this significant conference in Rio de Janeiro for the first time since 2009, maintaining momentum, fostering knowledge, and addressing the critical challenges in advancing nuclear programs.

We deeply appreciate your presence and valuable contributions to the discussions aimed at shaping state policy for the Brazilian nuclear program. We extend our deepest gratitude and highest regard for your support.

Yours faithfully,

Carlos Freire Moreira

Aben President

INA C 2024 in Numbers and Figures

304 registered participants and more than 700 people all together circulated by Expolnac

772 participants from Brazil; 32 from abroad

494 scientific papers were presented, **67** of them presented orally and **427** as posters.

Delegates from 7 Brazilian states and 11 countries, including Argentine, Brazil, China, Cuba, Latvia, Lithuania, Portugal, Russia, Spain, United Kingdom and USA

12 exhibitor booths in ExpoINAC, including Chinese CNNC,

Russian Rosatom, Spanish company Helgeson, the Brazilian-Argentine ABACC and Brazilians CNEN, Eletronuclear, FINEP, Amazul, EBSE, Sciofix, Eckert & Ziegler and GLP.

The event had social and environmental concerns, like the Nuclear Ambassador program and the use of recyclable materials.

We are very grateful to Escola de Guerra Naval and the Brazilian Navy, as well as Comissão Nacional de Energia Nuclear (CNEN) for providing their space and for the crucial help of their staff.

We would also like to thank O Dia News for its partnership in publicizing the event to the public.
